Drug and Alcohol Dependence, 21 (1988) 261 – 263
Elsevier Scientific Publishers Ireland Ltd.

DRUG AND ALCOHOL DEPENDENCE

SUBJECT INDEX

Volume 21 (1988)

Abstinence, morphine, naloxone, antagonism, rats, 189
Accidents (household, work and road), benzodiazepines, risk factor, alcoholism, 61
Addiction, training, clinical aspects, service organization, national policy, 127
Adolescents, illicit drugs, solvents, family, peers, 157
Aetiology, psychoactive substances, industrial workers (Egypt), prevalence, vulnerability, drug culture, predictors, 217
Aggression, alcohol, frustration, 237
Aggressive behavior, alcohol, provocation, humans, 105
Alcohol, aggression, frustration, 237
–, aggressive behavior, provocation, humans, 105
–, blood alcohol level, methodology, 243
–, cognition, performance, tolerance, 49
–, conditioned reactions, temptation, 29
–, consumption, self-reporting, Britain, 161
Alcoholics, erythrocytes, gangliosides, 77
Alcoholic liver disease, ethanol, propylthiouracil, hepatocyte area, 11
Alcoholism, attitudes, South Africa, 203
–, benzodiazepines, accidents (household, work and road), risk factor, 61
–, depression, biorhythm, core temperature, 1
–, Guillain-Barré syndrome, blood-brain barrier, 153
–, personality disorders, DSM III, treatment outcome, Italy, 171
–, plasma cyclic AMP, liver injury, family history, dementia, 7
–, screening, drug use disorders, 113
–, urine analysis, other drugs, treatment outcome, 57
Alcohol dependence, alexithymia, 133
Alcohol preference, dorsalis raphe, rats, 141
Alcohol withdrawal, brain hydration, magnetic resonance imaging, 25
Alexithymia, alcohol dependence, 133
Amantadine, cocaine, self-administration, baboon, 195
Anabasine, nicotine (self-administration), tupaias, clonidine, mecamylamine, 5-HTP, ipsapirone, 99
Antagonism, abstinence, morphine, naloxone, rats, 189
Antagonists, clonidine, opiates, withdrawal, 253
Attitudes, alcoholism, South Africa, 203

Baboon, amantadine, cocaine, self-administration, 195
Baclofene, morphine withdrawal, GABA, diazepam, bicuculline, 5-HTP, rat, 37
Benzodiazepines, accidents (household, work and road), risk factor, alcoholism, 61
Bicuculline, morphine withdrawal, GABA, baclofene, diazepam, 5-HTP, rat, 37
Biorhythm, alcoholism, depression, core temperature, 1
Blood-brain barrier, alcoholism, Guillain-Barré syndrome, 153
Blood alcohol level, alcohol, methodology, 243
Blood pressure, stress, human subjects, cardiovascular activity, heart rate, marijuana, 183
Brain hydration, alcohol withdrawal, magnetic resonance imaging, 25
Brain self-stimulation, ethanol, locomotor activity, 67
Britain, alcohol, consumption, self-reporting, 161
Buprenorphine, heroin, methadone, progressive ratio performance, opioids (mixed angonist-antagonist), reinforcing efficacy, drug (abuse liability and self-administration), 81

Cannabis, cognitive functions, memory, intelligence, India, 147
cardiovascular activity, stress, human subjects, blood pressure, heart rate, marijuana, 183
Clinical aspects, addiction, training, service organization, national policy, 127
Clofibrate, ethanol, hepatocytes, lauric acid hydroxylation, 137
Clonidine, nicotine (self-administration), tupaias, anabasine, mecamylamine, 5-HTP, ipsapirone, 99
–, opiates, withdrawal, antagonists, 253
Cocaine, amantadine, self-administration, baboon, 195
Cognition, alcohol, performance, tolerance, 49
Cognitive functions, cannabis, memory, intelligence, India, 147
College students, expectancies, race, drinking, 247
Conditioned reactions, alcohol, temptation, 29
Consumption, alcohol, self-reporting, Britain, 161
Core temperature, alcoholism, depression, biorhythm, 1

Dementia, alcoholism, plasma cyclic AMP, liver injury, family history, 7
Depression, alcoholism, biorhythm, core temperature, 1
–, ethanol, dexamethasone suppression test (DST), liver function test, hepatic histological status, 231
Dexamethasone suppression test (DST), ethanol,

depression, liver function test, hepatic histological status, 231
Diazepam, morphine withdrawal, GABA, baclofene, bicuculline, 5-HTP, rat, 37
Dorsalis raphe, alcohol preference, rats, 141
Drinking, expectancies, race, college students, 247
Drug (abuse liability and self-administration), buprenorphine, heroin, methadone, progressive ratio performance, opioids (mixed angonist-antagonist), reinforcing efficacy, 81
Drug culture, psychoactive substances, industrial workers (Egypt), prevalence, aetiology, vulnerability, predictors, 217
Drug use disorders, screening, alcoholism, 113
DSM III, alcoholism, personality disorders, treatment outcome, Italy, 171

Enkephalin, opiates, sleep, new-born, 43
Erythrocytes, alcoholics, gangliosides, 77
Ethanol, brain self-stimulation, locomotor activity, 67
—, clofibrate, hepatocytes, lauric acid hydroxylation, 137
—, depression, dexamethasone suppression test (DST), liver function test, hepatic histological status, 231
—, liver, gamma-glutamyltransferase, glutathione, 19
—, morphine, intoxication, preference, rat, 177
—, propylthiouracil, hepatocyte area, alcoholic liver disease, 11
Expectancies, race, drinking, college students, 247

Families, heroin dependence, therapeutic community, group therapy, 213
Family, illicit drugs, solvents, adolescents, peers, 157
Family history, alcoholism, plasma cyclic AMP, liver injury, dementia, 7
Frustration, alcohol, aggression, 237

GABA, morphine withdrawal, baclofene, diazepam, bicuculline, 5-HTP, rat, 37
Gamma-glutamyltransferase, ethanol, liver, glutathione, 19
Gangliosides, alcoholics, erythrocytes, 77
Glutathione, ethanol, liver, gamma-glutamyltransferase, 19
Group therapy, heroin dependence, therapeutic community, families, 213
Guillain-Barré syndrome, alcoholism, blood-brain barrier, 153

Heart rate, stress, human subjects, cardiovascular activity, blood pressure, marijuana, 183
Hepatic histological status, ethanol, depression, dexamethasone suppression test (DST), liver function test, 231
Hepatocytes, ethanol, clofibrate, lauric acid hydroxylation, 137
Hepatocyte area, ethanol, propylthiouracil, alcoholic liver disease, 11
Heroin, buprenorphine, methadone, progressive ratio performance, opioids (mixed angonist-antagonist), reinforcing efficacy, drug (abuse liability and self-administration), 81
Heroin dependence, therapeutic community, group therapy, families, 213
5-HTP, morphine withdrawal, GABA, baclofene, diazepam, bicuculline, rat, 37
—, nicotine (self-administration), tupaias, anabasine, clonidine, mecamylamine, ipsapirone, 99
Humans, aggressive behavior, alcohol, provocation, 105
Human subjects, stress, cardiovascular activity, blood pressure, heart rate, marijuana, 183

Illicit drugs, solvents, adolescents, family, peers, 157
India, cannabis, cognitive functions, memory, intelligence, 147
Industrial workers (Egypt), psychoactive substances, prevalence, aetiology, vulnerability, drug culture, predictors, 217
Intelligence, cannabis, cognitive functions, memory, India, 147
Intoxication, morphine, ethanol, preference, rat, 177
Ipsapirone, nicotine (self-administration), tupaias, anabasine, clonidine, mecamylamine, 5-HTP, 99
Italy, alcoholism, personality disorders, DSM III, treatment outcome, 171

Lauric acid hydroxylation, ethanol, clofibrate, hepatocytes, 137
Liver, ethanol, gamma-glutamyltransferase, glutathione, 19
Liver function test, ethanol, depression, dexamethasone suppression test (DST), hepatic histological status, 231
Liver injury, alcoholism, plasma cyclic AMP, family history, dementia, 7
Locomotor activity, ethanol, brain self-stimulation, 67

Magnetic resonance imaging, brain hydration, alcohol withdrawal, 25
Marijuana, stress, human subjects, cardiovascular activity, blood pressure, heart rate, 183
Mecamylamine, nicotine (self-administration), tupaias, anabasine, clonidine, 5-HTP, ipsapirone, 99
Memory, cannabis, cognitive functions, intelligence, India, 147
Methadone, buprenorphine, heroin, progressive ratio performance, opioids (mixed angonist-antagonist), reinforcing efficacy, drug (abuse liability and self-administration), 81
Methodology, alcohol, blood alcohol level, 243
Morphine, abstinence, naloxone, antagonism, rats, 189
—, ethanol, intoxication, preference, rat, 177
Morphine withdrawal, GABA, baclofene, diazepam, bicuculline, 5-HTP, rat, 37

Naloxone, abstinence, morphine, antagonism, rats, 189
National policy, addiction, training, clinical aspects, service organization, 127
New-born, opiates, sleep, enkephalin, 43
Nicotine (self-administration), tupaias, anabasine, clonidine, mecamylamine, 5-HTP, ipsapirone, 99

Opiates, clonidine, withdrawal, antagonists, 253
—, sleep, new-born, enkephalin, 43
Opioids (mixed angonist-antagonist), buprenorphine, heroin, methadone, progressive ratio performance, reinforcing efficacy, drug (abuse liability and self-administration), 81
Other drugs, alcoholism, urine analysis, treatment outcome, 57

Peers, illicit drugs, solvents, adolescents, family, 157
Performance, alcohol, cognition, tolerance, 49
Personality disorders, alcoholism, DSM III, treatment outcome, Italy, 171
Plasma cyclic AMP, alcoholism, liver injury, family history, dementia, 7
Predictors, psychoactive substances, industrial workers (Egypt), prevalence, aetiology, vulnerability, drug culture, 217
Preference, morphine, ethanol, intoxication, rat, 177
Prevalence, psychoactive substances, industrial workers (Egypt), aetiology, vulnerability, drug culture, predictors, 217
Progressive ratio performance, buprenorphine, heroin, methadone, opioids (mixed angonist-antagonist), reinforcing efficacy, drug (abuse liability and self-administration), 81
Propylthiouracil, ethanol, hepatocyte area, alcoholic liver disease, 11
Provocation, aggressive behavior, alcohol, humans, 105
Psychoactive substances, industrial workers (Egypt), prevalence, aetiology, vulnerability, drug culture, predictors, 217

Race, expectancies, drinking, college students, 247
Rat, morphine, ethanol, intoxication, preference, 177
—, morphine withdrawal, GABA, baclofene, diazepam, bicuculline, 5-HTP, 37
—, abstinence, morphine, naloxone, antagonism, 189
—, dorsalis raphe, alcohol preference, 141
Reinforcing efficacy, buprenorphine, heroin, methadone, progressive ratio performance, opioids (mixed angonist-antagonist), drug (abuse liability and self-administration), 81
Risk factor, benzodiazepines, accidents (household, work and road), alcoholism, 61

Screening, drug use disorders, alcoholism, 113
Self-administration, amantadine, cocaine, baboon, 195
Self-reporting, alcohol, consumption, Britain, 161
Service organization, addiction, training, clinical aspects, national policy, 127
Sleep, opiates, new-born, enkephalin, 43
Solvents, illicit drugs, adolescents, family, peers, 157
South Africa, alcoholism, attitudes, 203
Stress, human subjects, cardiovascular activity, blood pressure, heart rate, marijuana, 183

Temptation, alcohol, conditioned reactions, 29
Therapeutic community, heroin dependence, group therapy, families, 213
Tolerance, alcohol, cognition, performance, 49
Training, addiction, clinical aspects, service organization, national policy, 127
Treatment outcome, alcoholism, personality disorders, DSM III, Italy, 171
—, alcoholism, urine analysis, other drugs, 57
Tupaias, nicotine (self-administration), anabasine, clonidine, mecamylamine, 5-HTP, ipsapirone, 99

Urine analysis, alcoholism, other drugs, treatment outcome, 57

Vulnerability, psychoactive substances, industrial workers (Egypt), prevalence, aetiology, drug culture, predictors, 217

Withdrawal, clonidine, opiates, antagonists, 253
